

THE READY-HEAT MILITARY BLANKET LINE

The Temperature Management Solution

Our proprietary panel technology is used for incremental, continuous and consistent warming. All Ready-Heat Blankets come individually sealed in an oxygen free protective poly-bag. When the bag is opened, the blanket's thermal pads react with oxygen in the atmosphere and generate heat.

Ready-Heat blankets will heat to operating temperature in 15-20 minutes and provide sufficient warmth and comfort for at least 10 hours.

Combat Casualty Care

Fixed Wing and Rotary Air Transport

Ready-Heat is part of the Hypothermia Prevention Management Kit

4 Panel and 6 Panel Blankets

- Both blankets are US Military protocol used in the transport of wounded soldiers and the Ready-Heat 4 panel is carried by every US Army Medic.
- Due to their high tensile strength both can be used as an evacuation litter and can carry a person weighing up to 250 lbs.
- The 4 Panel is now available in a strategic military color design with blue inside and beige outside.
- Can be used in conjunction with an outer body wrap.
